Notes

SCREEN

Result Line (stand-alone) - Expanded excerp

Note:
TBD functionality to switch views from Expanded to Simple and show/hide the Excerp.

1 Document title
This links to the SSW preview page. On hover it will underline. If too it will truncate with an elipsis.

2 Accessiblity Icons
Icons for Archived, Internal, Non-IBM, Restricted will display if the document has these statuses. Each will have a tooltip like the other metadata tooltips.

3 Accessibilty Icons Tooltips
Each of these icons will have a tooltip with the name and metadata technical name.

4 Actual URL of document and icon
This is the full URL of the document webpage outside of SSW. It will link to the document webpage and leave SSW opening a new browser tab. On hover it will underline.

5 Excert of document
This is the beginning of the document. It will be 3 lines and truncated with an ellipsis to show there is more.

6 Main metadata attributes
These 8 metadata attributes will have an icon and the metadata attribute value. The value will truncate and display an ellipsis if too long. If the document does not have a value the icon will still display but the attribute value will be "N/A". Each will have a tooltip on hover.

7 Metadata ARM Total Votes
If this is an ARM document then the Total Votes of all ARM categories will be displayed.

8 Search term highlight (i.e. test)
The search term from the SSW top search area will be highlighted each time it displays in the Document title and the excerpt.

9 Tooltip for metadata attributes (i.e. test)
On hover a tooltip will display for all metadata that will display the attribute name in natural language and the metadata attributeName to help users use Advanced Query Syntax and the attribute value (in case the value is truncated on the page).

10 Document title that does not have a preview in SSW
Documents that do not have a preview in SSW will not be linked. To view the document users will have to click on the full URL link.

11 Tooltip for ARM metadata and votes
On hover a tooltip will display with the attribute name in natural language and the metadata attributeName to help users use Advanced Query Syntax. In additon the total ARM votes for up and down will display which is a total for all voting categories.

12 New SSW logo
This is a placeholder for a new SSW logo.

SCREEN

Result Line (stand-alone) - Simple no excerp

Note:
TBD functionality to switch views from Expanded to Simple and show/hide the Excerp.

① **Source metadata**
Source will be displayed in a set column before document title. It will have a icon and value and tooltip on hover. If the source text needs to be truncated an ellipsis will display.

② **Document title**
See "Result Line (stand-alone) - Expanded excerp" for functionality.

③ **Accessiblity Icons**
Icons for Archived, Internal, Non-IBM, Restricted will display if the document has these statuses. Each will have a tooltip like the other metadata tooltips.

④ **Removed**

⑤ **Tooltip - Document title**
Tooltip will display information that is not listed in the Simple view of the search results except Source which will be repeated. Nothing in the tooltip is linked or interactive. It will have:
-Actual URL of document
-Excerp (if it's not displayed in the simple view)

Note: User's won't be able to view any truncated values because there will be no on hover states with tooltips here.

⑥ **Document title that does not have a preview in SSW**
Documents that do not have a preview in SSW will instead link to the document webpage outside of SSW and include the New Window icon at the end of the title.

New SSW Icon
