## Features list

## The Micromedex with Watson difference

From multiple integration options to an AI-powered mobile browser upgrade, here's what sets us apart.

### Evidence-based content

View evidence-based content on drug classes, management, IV compatibility, drug safety and more – sourced from 8,500 journals and 750,000 publications.

### Accredited editorial process

Watson Health evaluates and curates Micromedex content using an editorial process accredited by the National Institute for Health and Care Excellence (NICE).

### AI-powered search

AI-based Watson Assistant rapidly searches libraries of drug content. Simply type questions in everyday language, such as: Are there renal dosing adjustments?

### Natural language processing

Watson Assistant uses natural language search to find the most relevant drug evidence based on your queries. This means you get the information you need, fast.

### EHR integration

Integrated delivery embeds Watson Assistant in any location within the EHR so you can get answers without interrupting workflows.

### Context-specific search

InfoButton functionality allows you to quickly jump from drug references within the electronic patient record to information about that drug.

### Mobile applications

Five complimentary mobile applications provide the same functionality and depth of content as Micromedex online.

### Mobile AI upgrade

Upgrade to Micromedex with Watson for Mobile Browsers and conduct AI-powered searches on-the-go.
